

Bentley's Maple Products

Prices in effect from December 2011

Jean and Avarid Bentley, from Westchester in the Wentworth Valley, produce pure, uncontaminated maple products that are free of the formaldehyde and chemical defoaming agents used throughout the maple industry. We order from the Bentleys four times per year—during the spring syringing season, in early summer, in the early autumn, and in time for December holidays and gift giving.

We buy extra maple syrup and sugar when we place our large maple orders, so if you need some and it's not a maple order month, please don't hesitate to ask—we are likely to have some on hand.
