

Down East Cleaning Products

Prices in effect from November 2011

This Nova Scotia company produces excellent scent-free cleaning products that are well tolerated by chemically-sensitive individuals. All products are septic-safe and bear the EcoLogo seal of approval. Down East's 4L containers are made in Nova Scotia from recycled plastic.

Down East was one of the very first companies to create unscented products and offer bulk liquids in reusable, refundable containers. Their products may not be flashy-looking, but Down East has been doing it right for a long time! For maximum ecological benefit, buy your products in 20L returnable containers... nothing goes into the waste stream this way.

Down East charges a \$10 deposit on its square 20L containers; you may bring these to Ellora for a \$10 refund, provided they are clean, dry and empty, with all parts attached. You may also order most Down East products in non-refundable, useful round 20-L recyclable plastic pails.
