

Just Us! Coffee Roasters

Prices in effect from February 2010

Just Us is a small cooperative that imports fairly-traded certified organic coffee beans from small farm cooperatives around the world, and roasts them on its premises in Canning, Nova Scotia. Just Us also imports fair-trade organic teas, sugar and chocolate, and makes wonderful handcrafted chocolates at its Hantsport chocolate factory. In addition to delicious roasted coffees and chocolate products, Just Us is now offering a selection of unroasted green coffee beans for home roasters, and organic chocolate couverture for artisanal chocolate making.

Why buy organic, fair-trade coffee? Conventionally-grown coffee is the world's most heavily-pesticided food commodity; its production leads to serious health problems amongst plantation workers and considerable environmental degradation. Just Us's organic coffees are grown in the shade, as companion crops to larger trees, rather than on conventional, heavily-sprayed clear-cuts. Fair trade ensures farmers are paid appropriately for their products, have healthy work and social environments, and are part of democratically-run work communities.

Just Us coffees are roasted to order, then shipped within 24 hours to guarantee the freshest coffee possible. Decaffeinated coffees are produced using chemical-free methods consistent with organic production. We order from this supplier every month.
